

■ Where are you today, and where do you **need** or **want** to be?

- Understand requirements
- Set target
- Establish gap
- Define strategy
- Prioritise remediation
- Implement plan

- Just like ogres and onions, GDPR has multiple layers – no one size fits all

- Policy
- Procedures
- Technical Controls
- Security Controls
- Training & Awareness
- Verification
- Testing
- Governance
- Audit

- Data protection designed by default
- Data minimisation
- Data classifications
- Data handling and processing
- Ability to identify, track and locate personal data and identifiers
- Response to subject access requests
- Ability to obtain and record active consent
- The right to be forgotten
- Preventing data loss and leakage
- Ability to detect, triage and report a breach within 72 hours

Make the investment
count...

Insource or outsource – we're in it together
